VULNERABILITY ASSESSMENT, 2026

Cys 330 **Date:** 15th September 2026

An organization has called upon you to ask that you help them with vulnerability assessment on what they believe is an insider threat.

Propose a remediation plan to management using a PERT chart. In your assignment, you are expected to clearly show the following:

- Activity table
- Network diagram
- Determination of the critical path
- Project expected duration in months
- Expected variance of the critical path
- Computational solutions in terms of the expected standard deviation of the critical path

- Submission should only be through hardcopies by Wednesday, at 16: 00 hours.
- Use **IEEE referencing style** and your assignment should be well edited and formatted with page numbers.
- Use not less than five (5) references. Possibly, use Zotero for referencing check and help.
- Any form of copying and using illegal means will attract a zero mark.
