

ROAD TO SOFTWARE ENGINEERING

INTRODUCTION TO HTML

AGENDA

- Learn – Course Setup
- Learn – How to Learn
- Learn – Client Server Model
- Code - #100Evdx About Page
- Learn – What is HTML
- Learn – Structure
- Learn – Syntax
- Code – Lab Time

QUESTIONS

Trough of sorrow

Three (3) things to make it through the trough of sorrow

1. **Managing Frustration**

Failing over and over again

Marathon not a sprint

Eating right

Exercise

Don't let your dreams be dreams

Just do it

2. **Consistency**

biggest factor – everyday

you called me at the wrong time

3. **Taking Care of Yourself**

10 hrs a day within a week you are
tired

Course setup

- ☐ Materials
- ☐ Networking
 - ☐ 3 individuals already in Tech
 - ☐ 2 coffee chats
- ☐ submitting Work
 - ☐ after each class there will be home work
 - ☐ submitting through google forms for now then GitHub
- ☐ Coding challenge
 - ☐ every single day but after we start JavaScript
 - ☐

SYLLABUS

- ☐ HTML
- ☐ CSS
- ☐ JAVASCRIPT
- ☐ NODE
- ☐ REACT
- ☐ MONGODB

☐ To serve you from you self
there is no syllabus

Learn How To Learn

- Re-reading , taking notes & highlighting does work
-

What if there was a way to learn stuff faster, more efficiently and forever

ACTIVE RECALL

- Recalling things you have just read
- Talk to yourself – say it out loud

SPACED REPETITION

Learning how to learn

Active Recall

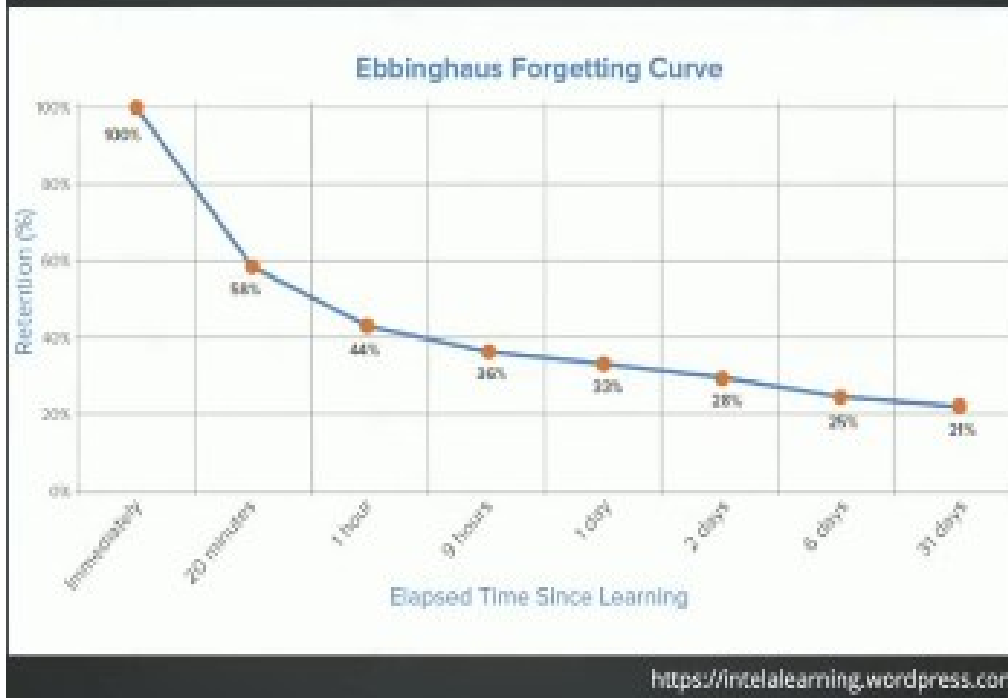

Ali Abdaal: <https://youtu.be/ukLnPblffxE>

Don't take notes, take questions

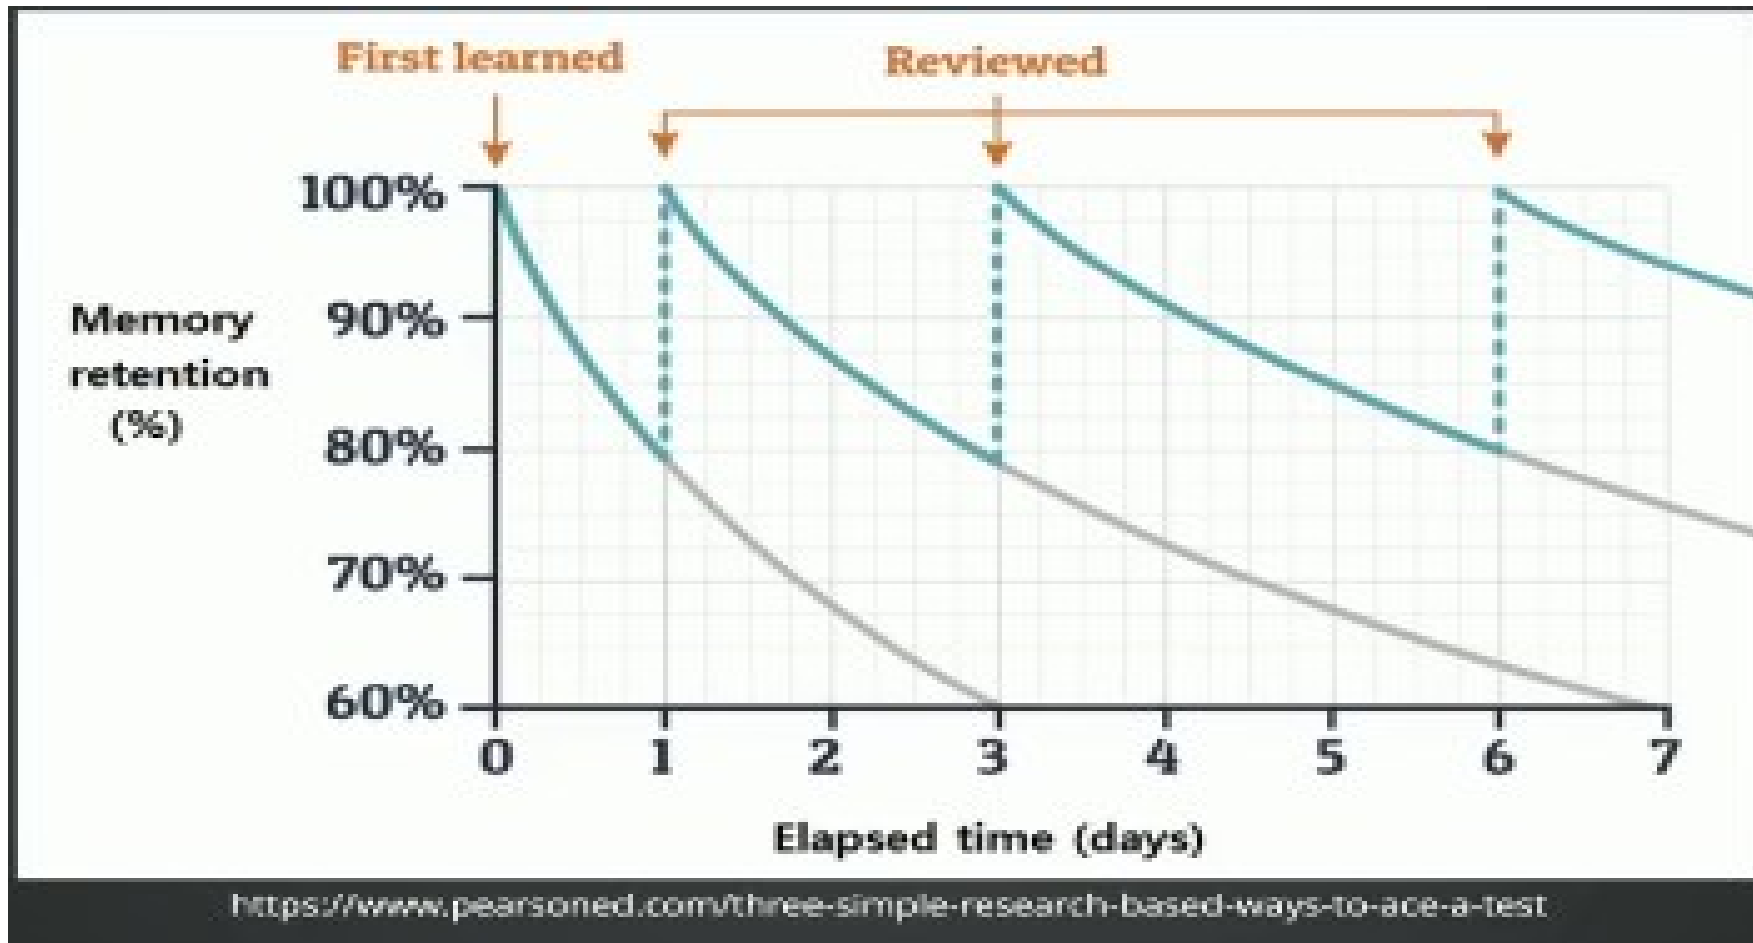

Forgetting Curve

Forgetting Curve*

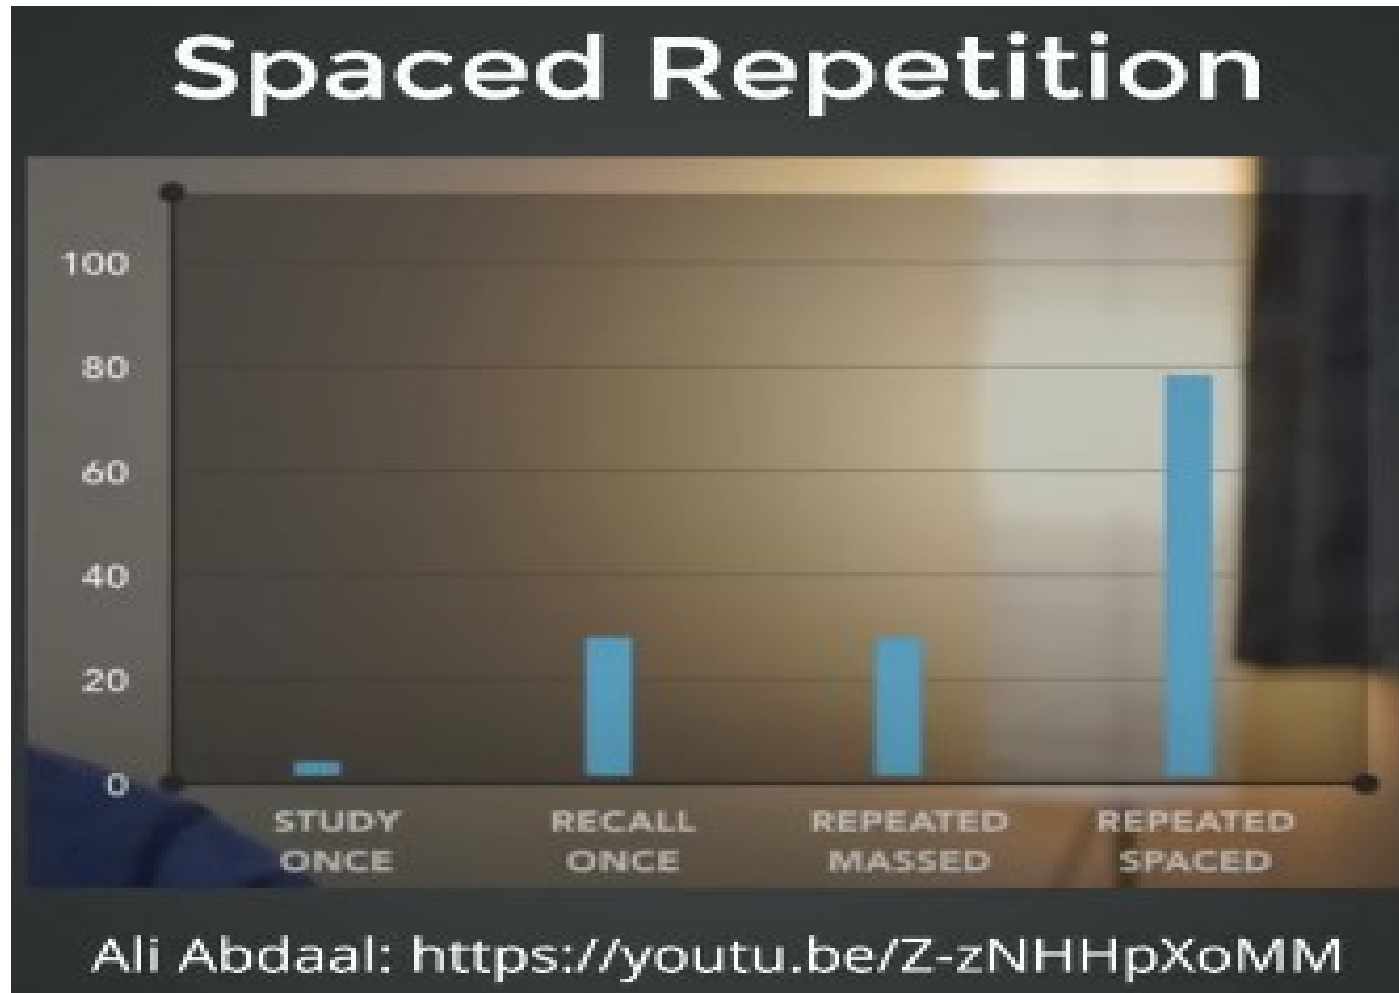

- Cumulative career, remembering the staff you did in the past so that you can build upon.

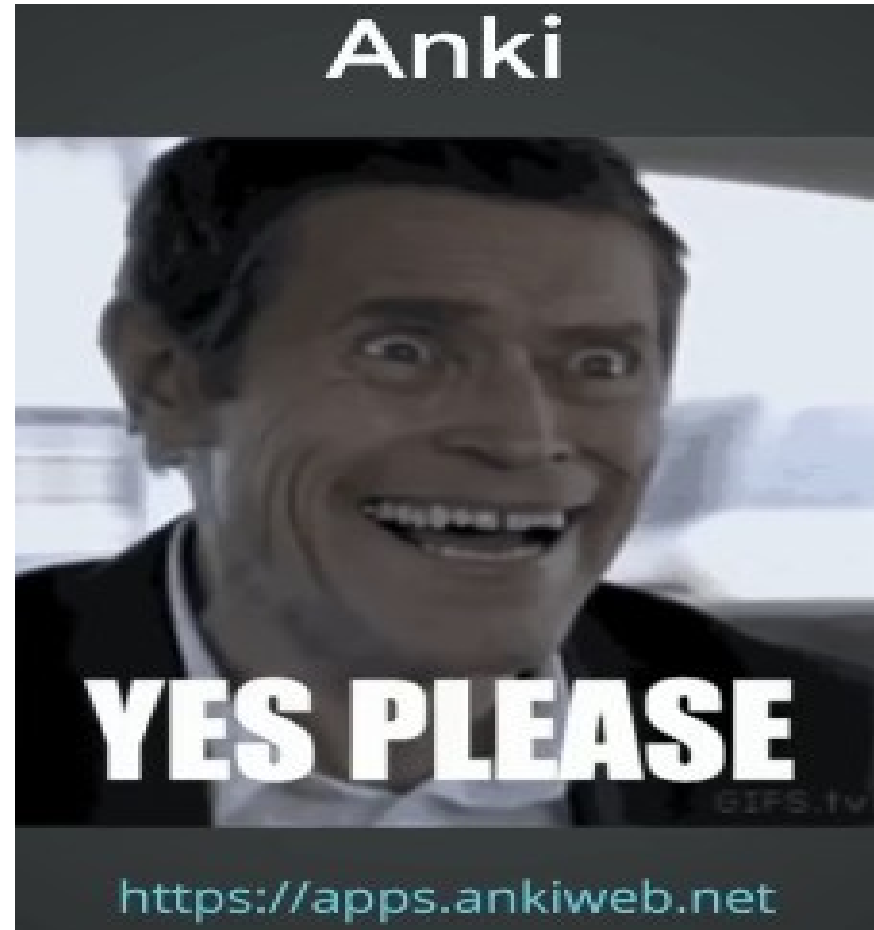

Resetting Forgetting Curve

Spaced Repetition

Resetting The Forgetting Curve

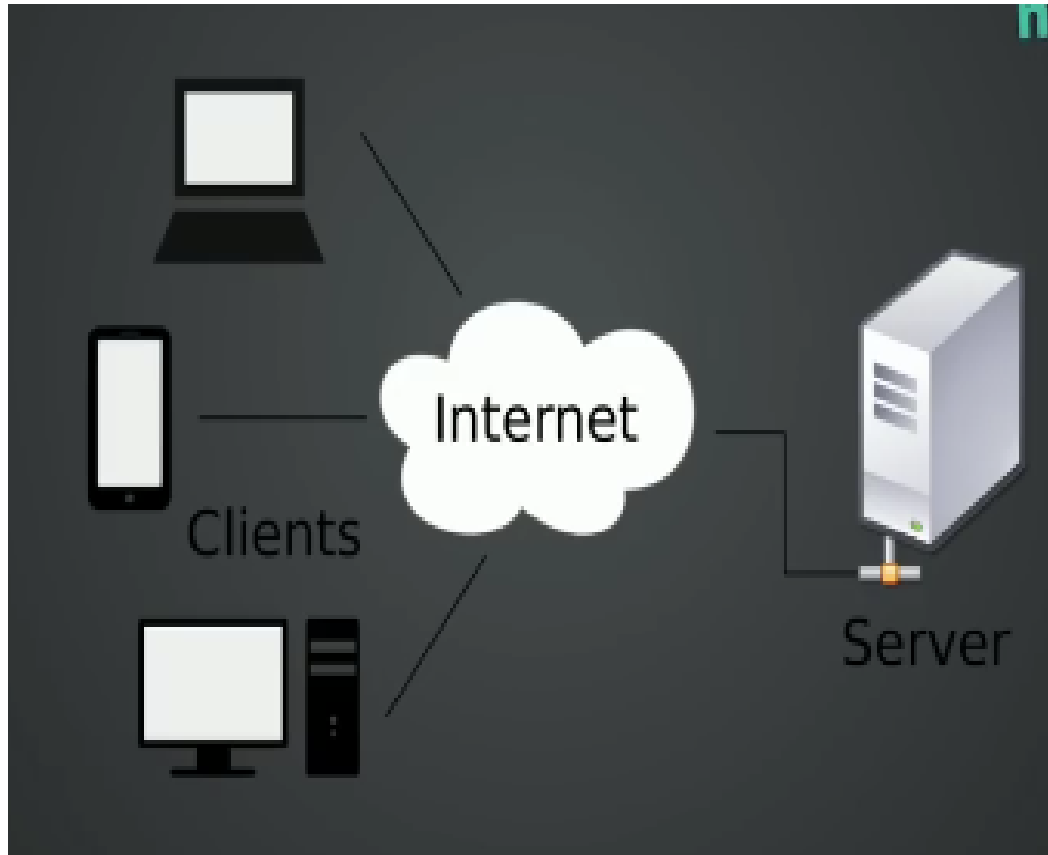

Why should you make your own Cards

Thank you

for putting in the cognitive effort

What is the internet?

❑ What the heck is the internet

❑ idea of a wire

❑ client side devices

❑ server side devices

❑ why is it called a server

❑ it serves a lot of kinds of content i.e. html, css, javascript

❑ on the client side device we make a request

What is the internet?

- What program would you use to open a pdf, word document?
- We have these programs that can run on our client side devices and
- these programs are good at opening certain types of files
- running on the client side device we have a browser really good opening certain types of files
- Using the browser will be making a request to the server
- Think of it as a restaurant
- Server is the kitchen
- From you table you can make request to the kitchen

Lets pretend we are ordering for from Glabs web site

- They will respond with hml, css and javascript
- content powered by what
- Beatify powered by what
- You could drag the ingredients on the pizza or order

Standard

HTML5?
W3C a brief history!

HTML5
Introduced New Features

- Video
- Audio
- Canvas
- Geolocation
- Websockets

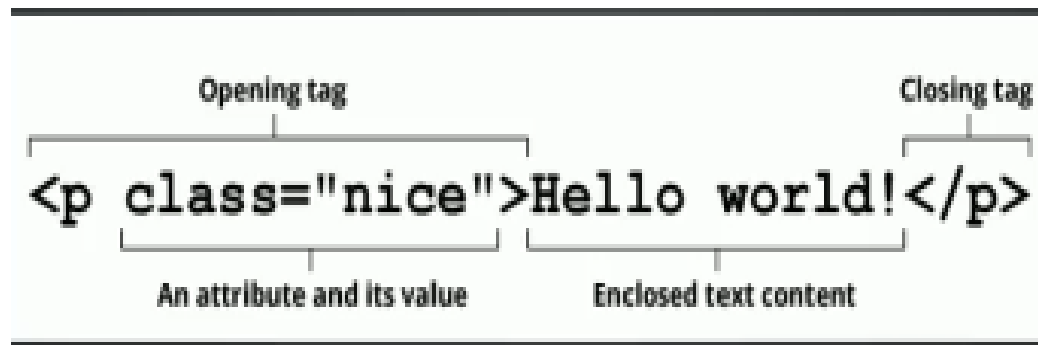

The Golden Rule

SEPERATION OF CONCERNS

- HTML = Content / Structure
- CSS = Style
- JS = Behavior / Interaction

- We want to keep our concerns separate and never should they mix.
- If I asked you to add an extra paragraph to your site what technology would you use
- Make something pink
- Make something wiggle
- Why is keeping them separate important

HTML SYNTAX

- ☐ Spelling And Grammar Rules
- ☐ every bit of content must be wrapped in a tag
- ☐ each tag has a reason why you should you it.
- ☐ when choosing tags we care about the importance of that element
- ☐ And the semantic behind that content
- ☐ in VS Code to avoid auto completion

HOME/WORK

- ❑ Complete: [Coursera - Learning how to Learn](<https://www.coursera.org/learn/learning-how-to-learn>).
- ❑ Watch: [Ali Abidaal - Evidence-based revision tips](<https://www.youtube.com/watch?v=ukLnPbIffxE>).
- ❑ Watch: [Ali Abidaal - Spaced Repetition / Evidence-based revision tips](<https://www.youtube.com/watch?v=Z-zNHHpXoMM>).
