SA 330 – ANIMAL HUSBANDRY Continuous Assessment Test 1: Date: 09/04/2024 **Duration: 2hrs**

Question One

You are the Livestock Extension Officer in Lavushi Manda district in Muchinga Province where the newly formed Livestock Farmers' Association has requested you to present a paper to the recruited farmers on critical considerations to be made when deciding which livestock species to venture into. Give a detailed explanation of the contents of your presentation. ***(20 marks)***

Question Two

Explain the following terms as they relate to animal production:

a) Fecundity ***(4 marks)***

b) Polytocous animals ***(4 marks)***

c) Polyoestrous animals ***(4 marks)***

d) Lordosis ***(4 marks)***

e) Dystokia ***(4 marks)***

Question Three

Give a detailed description of the husbandry practices that are encouraged in both a pig farrowing pen and fattening pen. ***(20 marks)***

Question Four

A local beef cattle farmer is very excited to see that more than half his herd of breeding cows is displaying signs of heat and the bulls have been deployed into the herd. After a month, the farmer is getting increasingly concerned because a number of cows are still being followed by the bulls and the cows are continuously submissive to the males for mating.

Give a detailed explanation to the farmer regarding the reasons behind this strange behavior he has observed among some of the breeding cows. ***(20 marks)***
