Kapasa Makasa University

Department	: ICT
Course	: Cybersecurity
Year	: 3
Course Name	: System Vulnerability Assessment
Course Code	: 330
Academic year	: 2024
Lecturer	: Paul M. Mutunda
Task	: Redemption Test

INSTRUCTIONS TO CANDIDATES

1. Write your **name and Student ID Number** on the Answer sheet provided
2. This test will mark out of **50%**
3. This paper has **four (4)** questions. Attempt all
4. Time allocation is exactly 2 hours

CamScanner

QUESTION ONE

Vulnerability assessment process is an ongoing process.

(a) Identify the **four (4)** steps involved in carrying out this process [4]

(b) With the aid of a diagram, explain the identified steps in (a) [11]

(c) Give **five (5)** differences between vulnerability management and vulnerability assessment [10]

QUESTION TWO

Explain the following in detail, giving the impact and mitigation of the impacts.

(a) Hardware vulnerabilities [5]

(b) Organisational vulnerabilities [5]

(c) Personal vulnerabilities [5]

(d) Software vulnerabilities [5]

(e) Network vulnerabilities [5]

QUESTION THREE

As an IT Chief of Security, you conducted a scan on a Local Area Network (LAN) for your organisation called "Nested" for a period of 3 days. The organisation comprises of 102 employees and has about 66 computers connected. Your start date was 10th May 2024 and expected date of completion was 13th May 2024. The industry of the organisation concerns Accounting. The following are some of the findings in your system auditing:

- Malware and botnet events detected – 24
- Evasive applications – 12
- Filesharing applications – 14
- Bandwidth consuming applications – 11
- Security risk applications – High
- Application vulnerability exploit – High
- Malware detected – 06

Task

Write a simple technical report considering the format of a technical report or 6 vital aspects [25]

QUESTION FOUR

Discuss **five (5)** possibilities with examples of why security fail [25]
