KAPASA MAKASA UNIVERSITY

DEPARTMENT OF INFORMATION AND COMMUNICATION TECHNOLOGY

BACHELOR OF SCIENCE IN CYBERCRIME INVESTIGATIONS

COURSE: CLOUD COMPUTING TECHNOLOGIES AND SERVICES

Duration: 90 min

Instructions:

Answer all questions

1. Distinguish containerization from virtualization with clear examples (1)
2. Define the three primary actors in a cloud ecosystem (3)
3. What is AWS IAM? Describe its basic components. (1)
4. Define Service Level Agreement (SLA) in cloud computing. What are the three parts (3)
5. Discuss the following in cloud computing environment (3)
   a. Kubernets
   b. ABI
   c. ROUTE 53.
6. A CSP discovers that during peak hours, their infrastructure cannot meet customer demand. They have relationships with three other CSPs who have spare capacity. They want to automatically redirect excess traffic. With the aid of diagram, design an Inter-cloud scenario with QoS Control that would solve this problem (3)
7. Describe any four services offered by AWS that you have learned. (2)
8. Explain the concept of CaaS and how it differs from DaaS (1)
9. Compare and contrast "Dangers" and "Vulnerabilities" in cloud security using real-world examples for each (1)
10. Using a diagram, demonstrate how the functions of a docker differs from that of an operating system and hypervisor. (2)
