Question

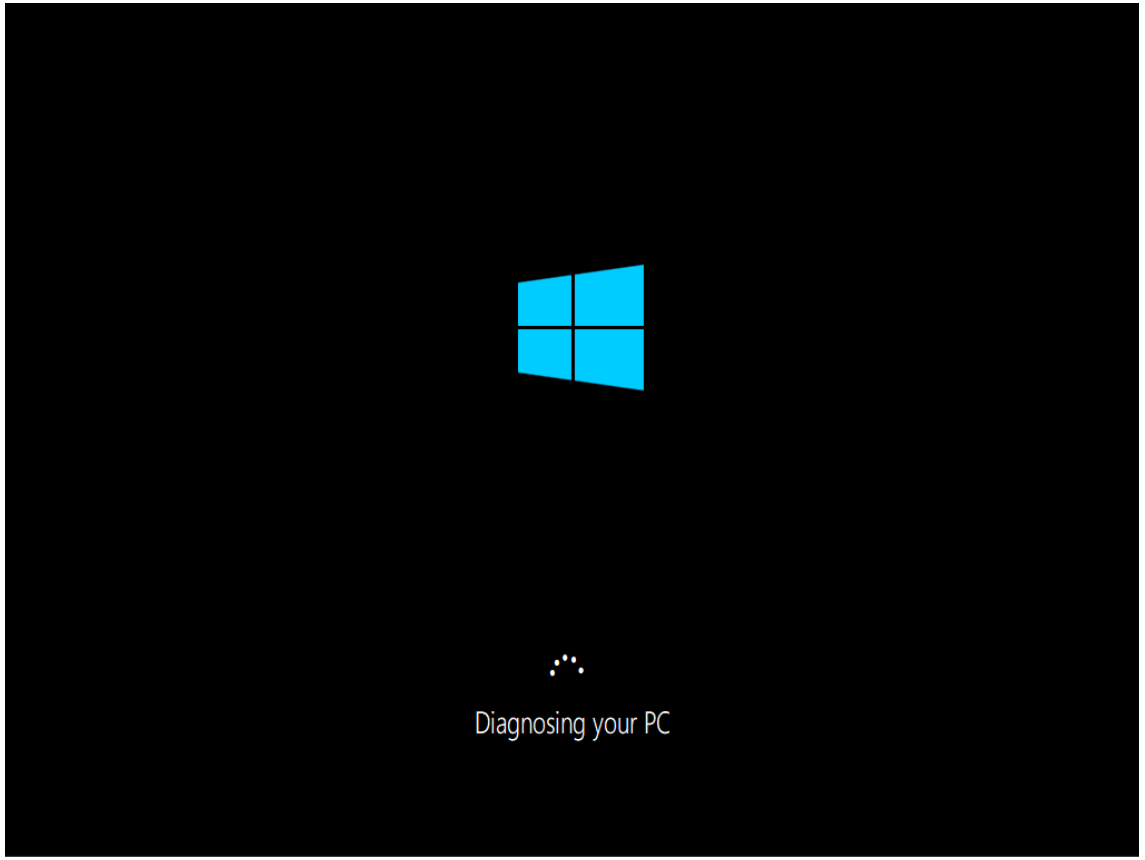

- Hacking Windows Admin login Account Using **CMD** or any tool of your choice (**Hiren's BootCD PE**).
- Question by Mr. Mwashi Matela
- Due on the 16th of April, 2025.

Forgotten Your Password?

Bypassing Forgotten Password Using CMD

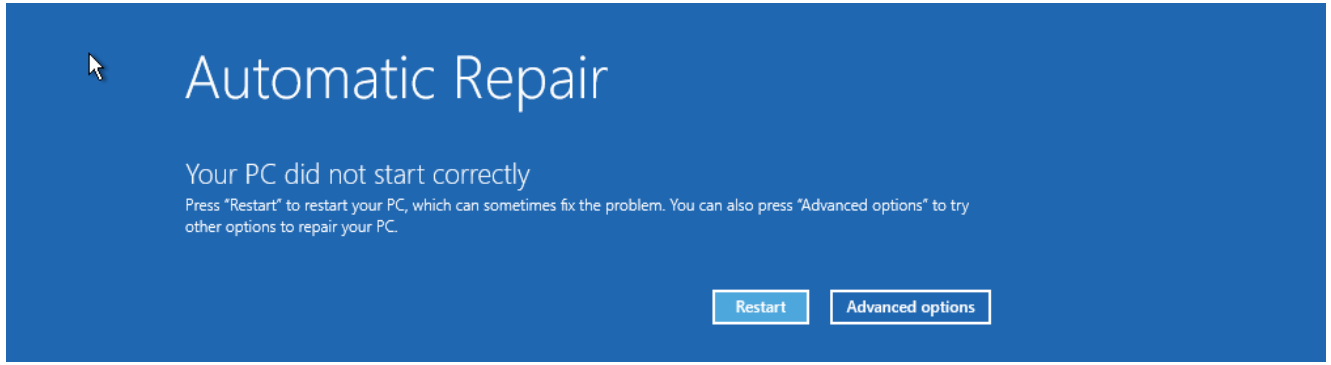

Repair Mode

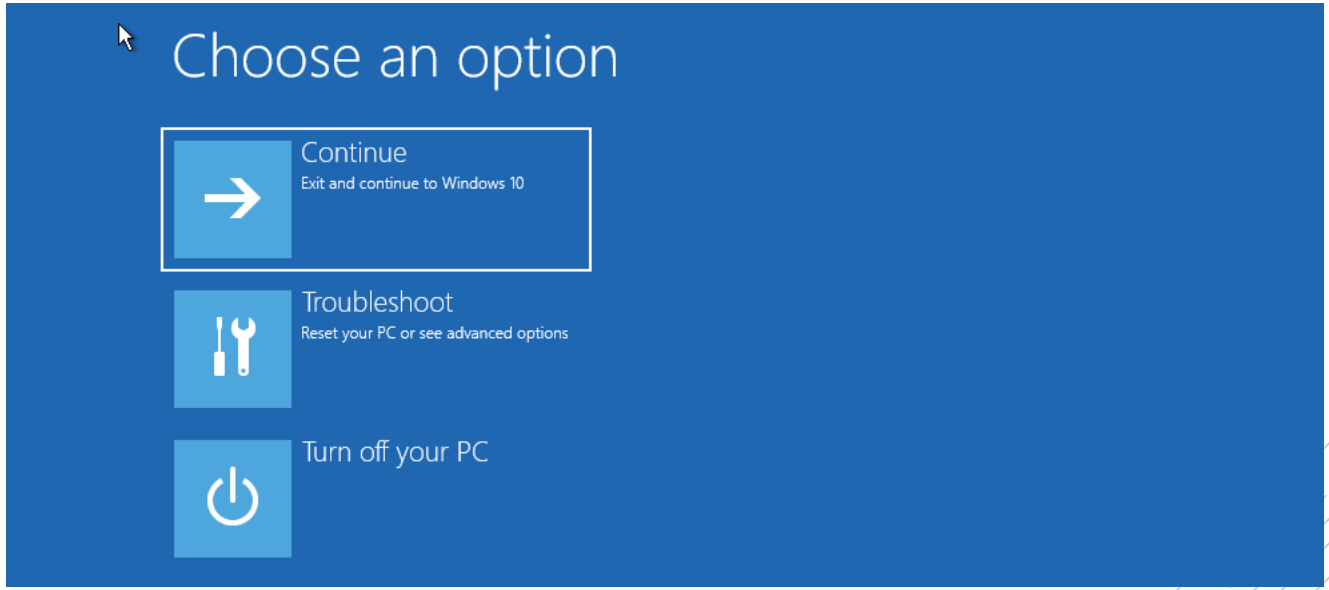

- Go into Windows **repair mode**, by forcing shutdown three (3) times.

Advanced Options

- Click on **Advanced Options → Trouble Shoot**

Recovery Options

- **Advanced Options → See More Recovery Options**

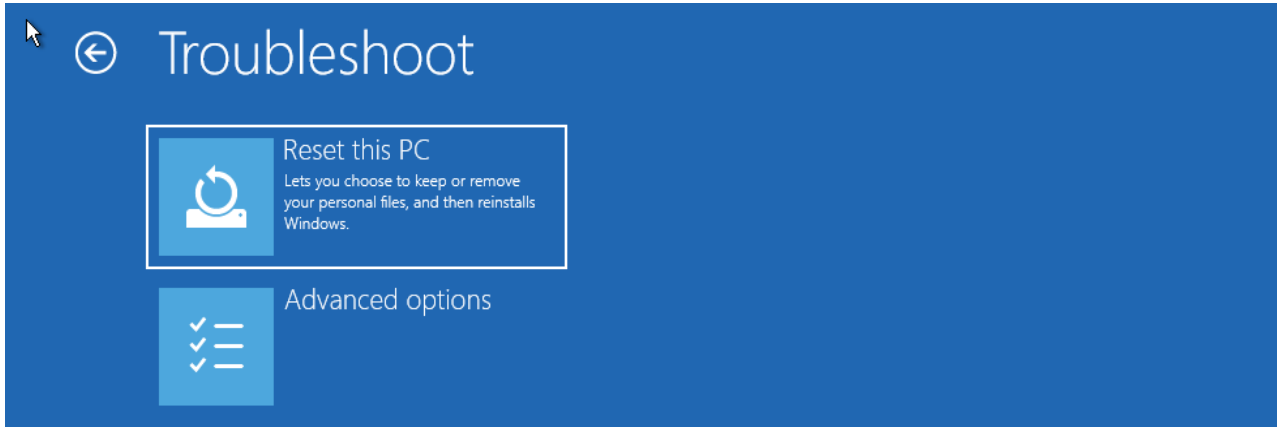

Image Recovery

- **System Image Recovery**

Image Recovery (Continues…)

- What ever will pop up on the screen, click on **Cancel**

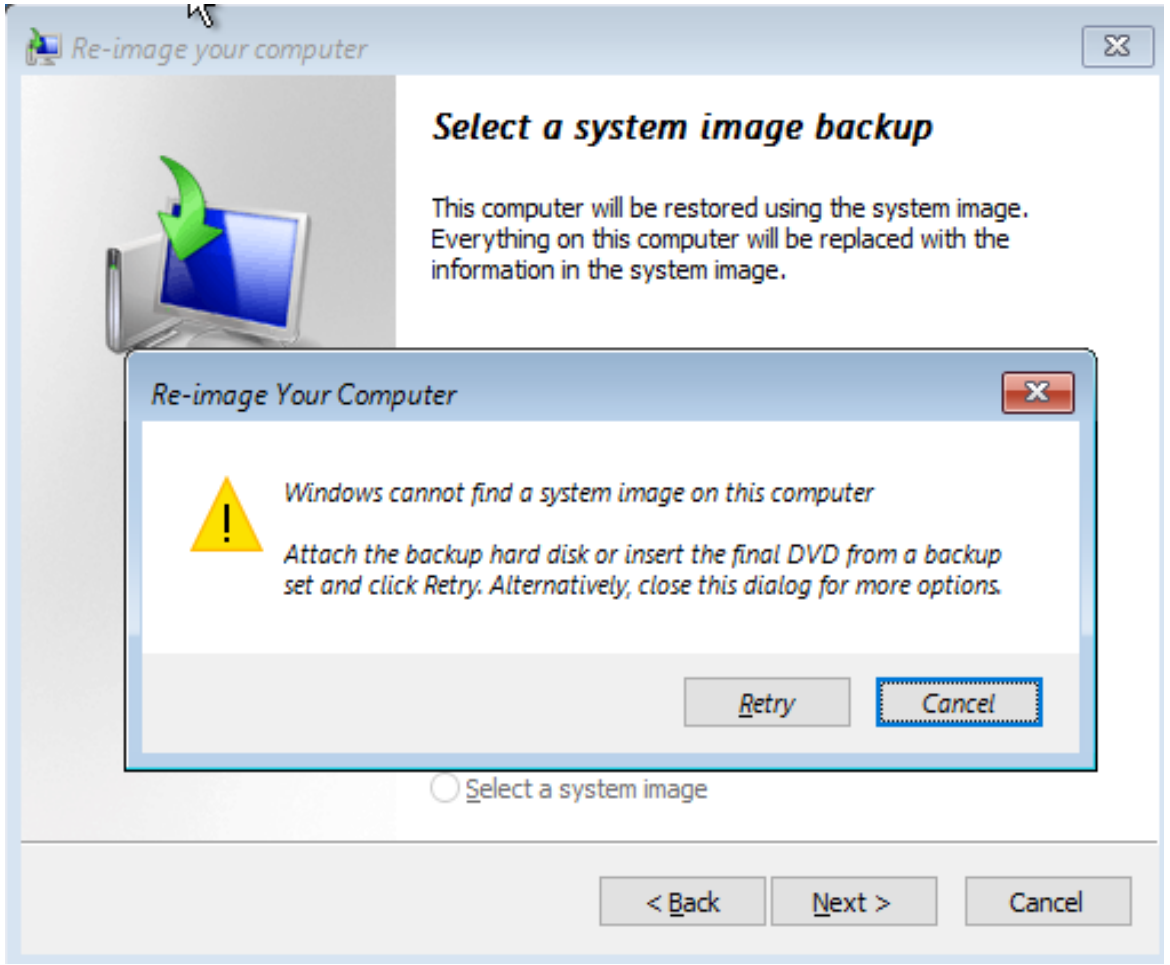

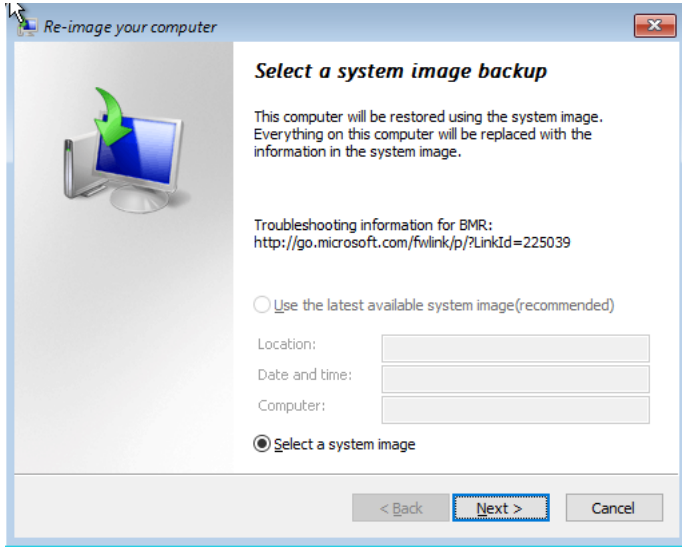

Image Recovery (Continues…)

- Select a **system image backup → Next > → Advanced…**

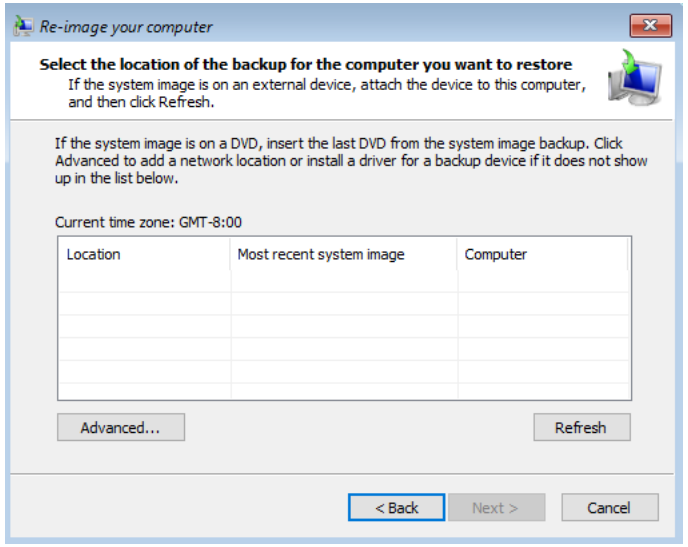

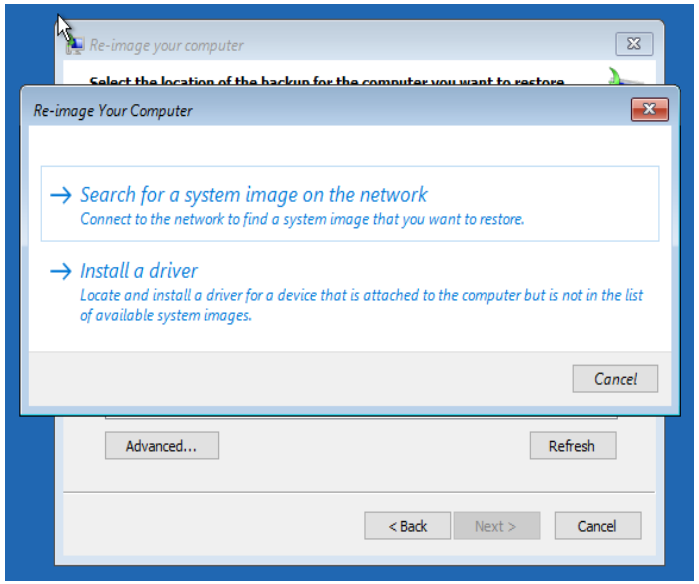

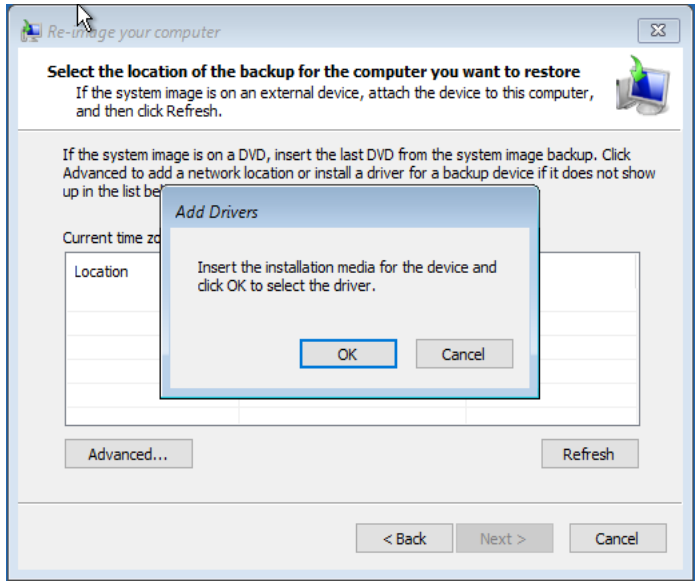

Image Recovery (Continues…)

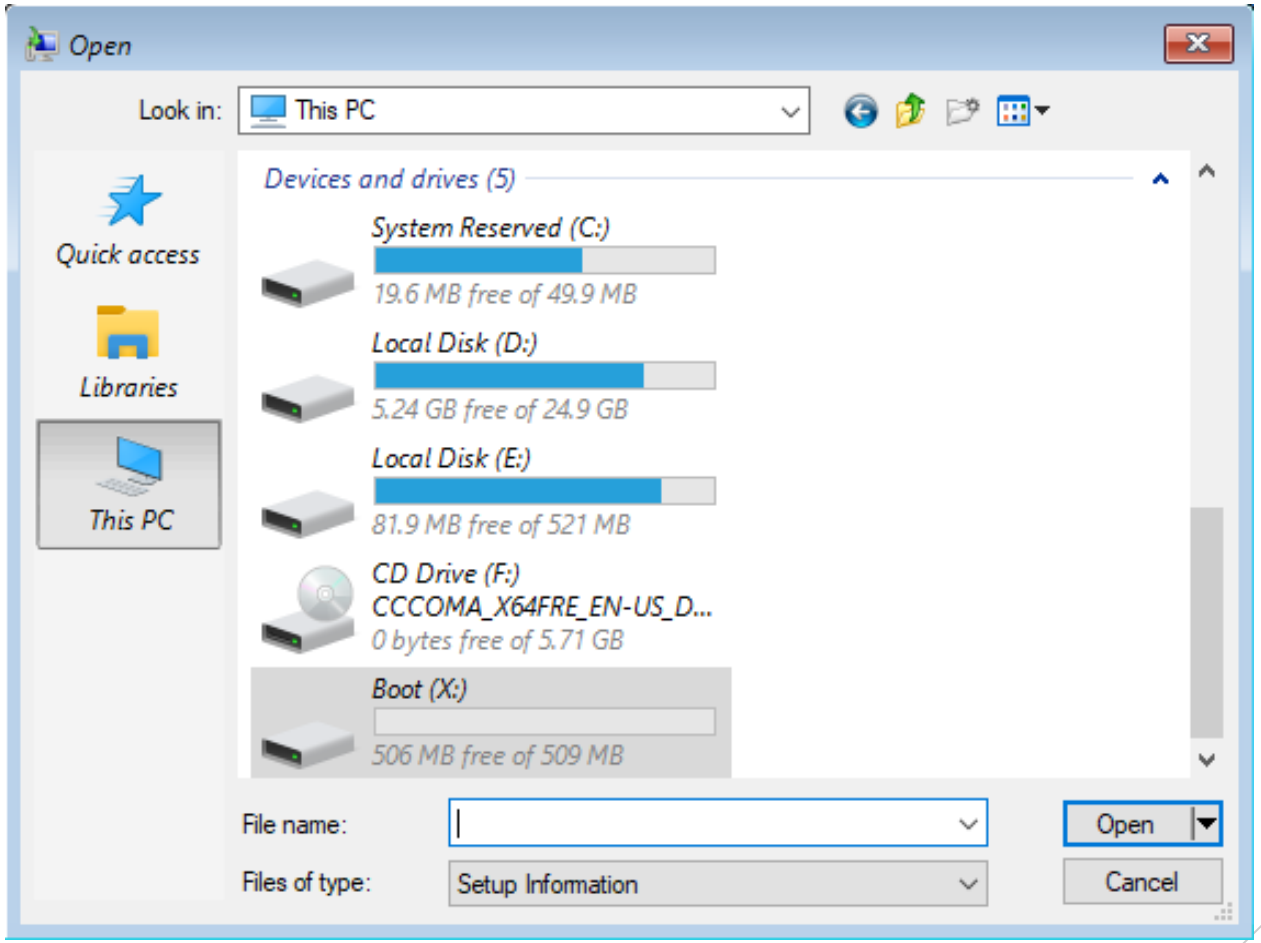

- A new window will pop, click **Install a Driver → OK**

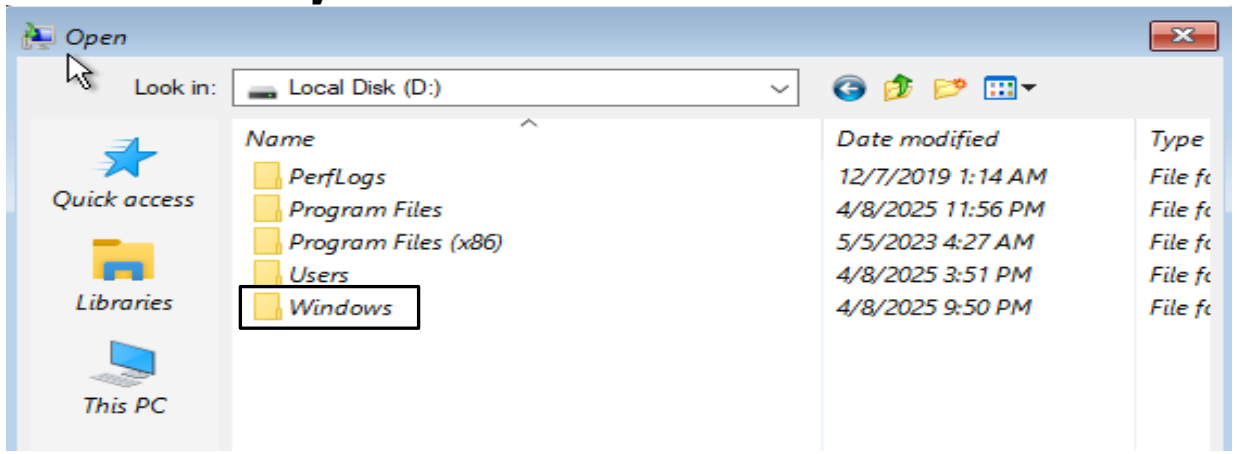

Local Disk (C) / (D)

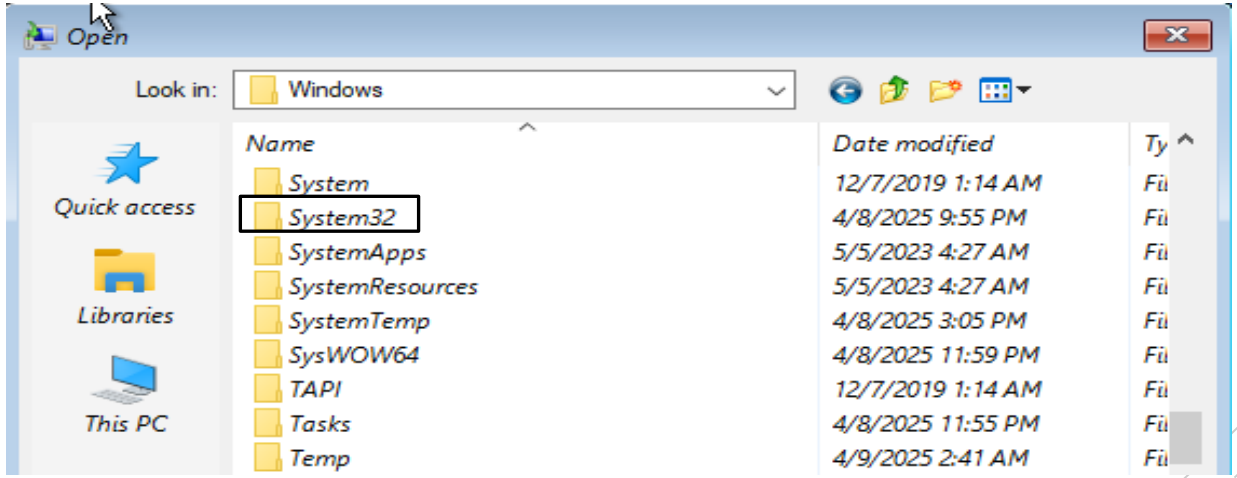

- Go on **This PC → Local Disk (C) / (D)**

System32

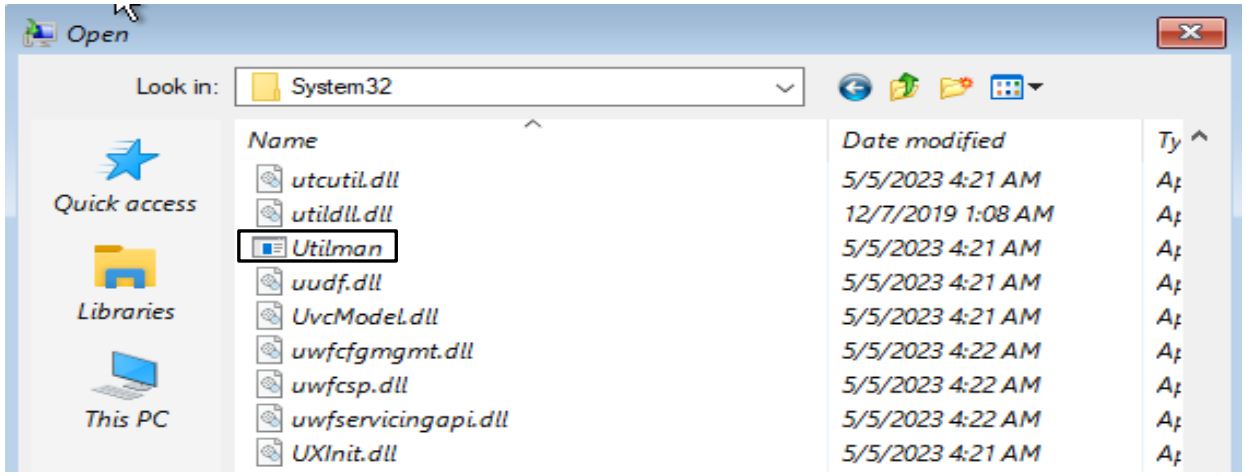

- Navigate the Folders;
- **Windows → System32**

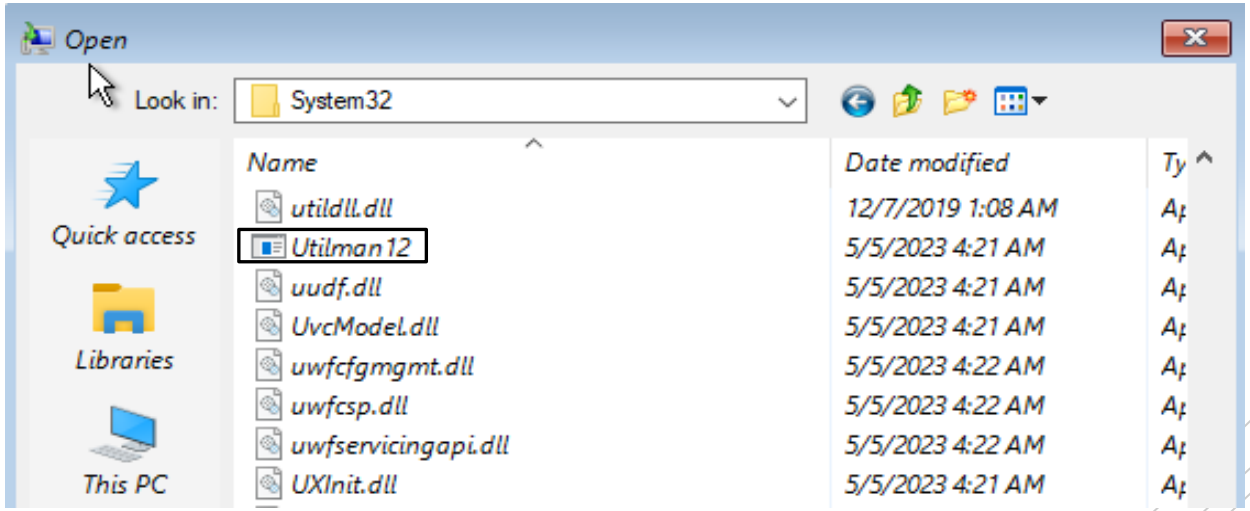

Utility Manager (Utilman)

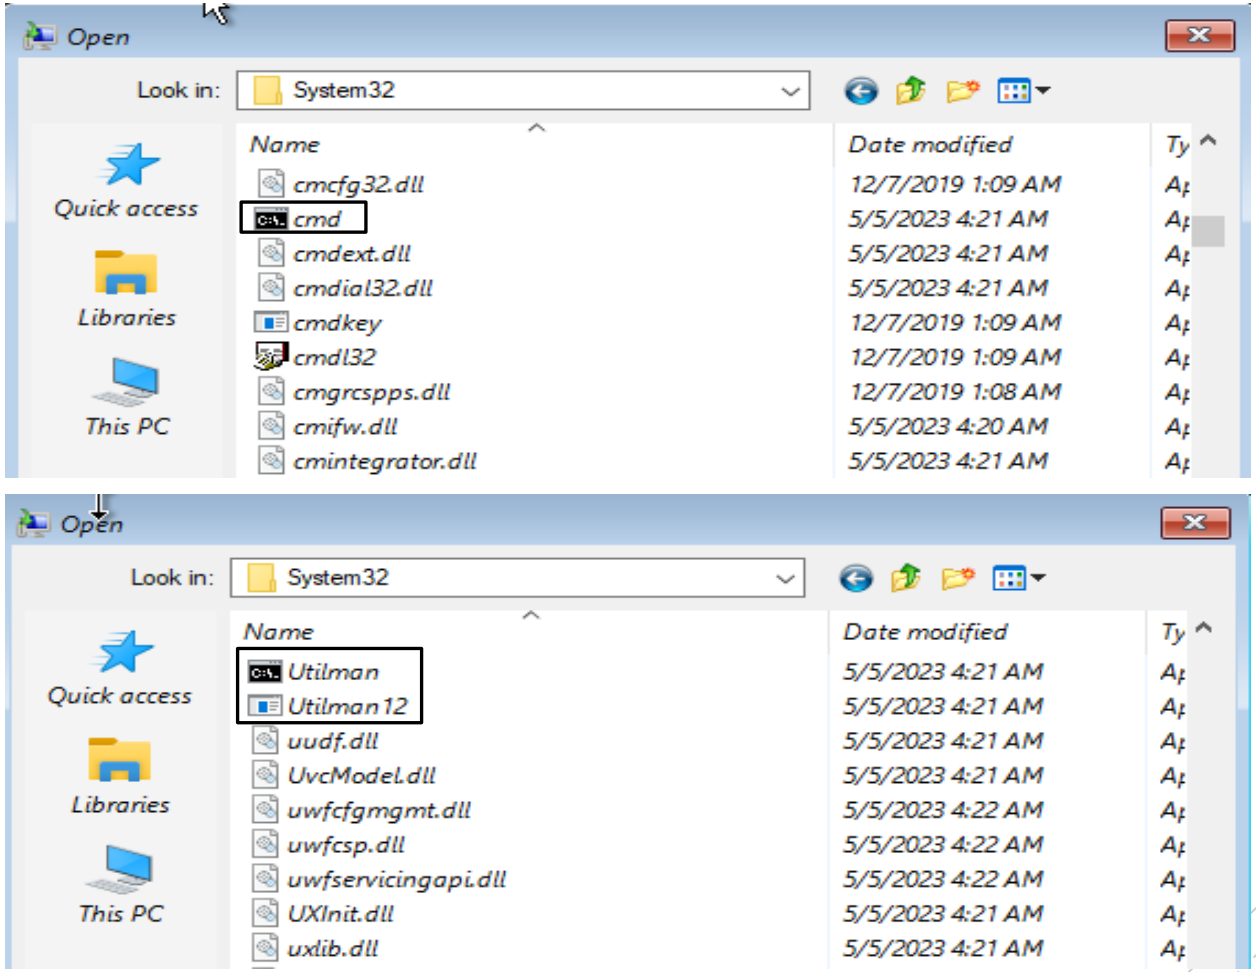

- Find the file called **Utilman** and **Rename** it (e.g., **Utilman12**) and **Refresh** the screen.

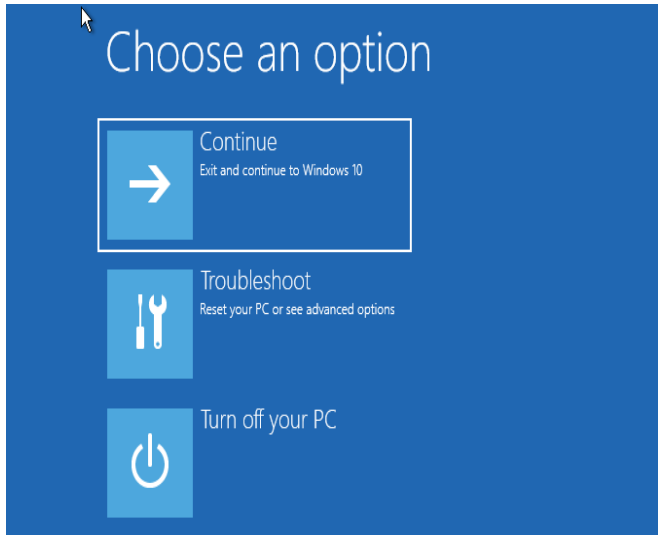

Command Prompt (CMD)

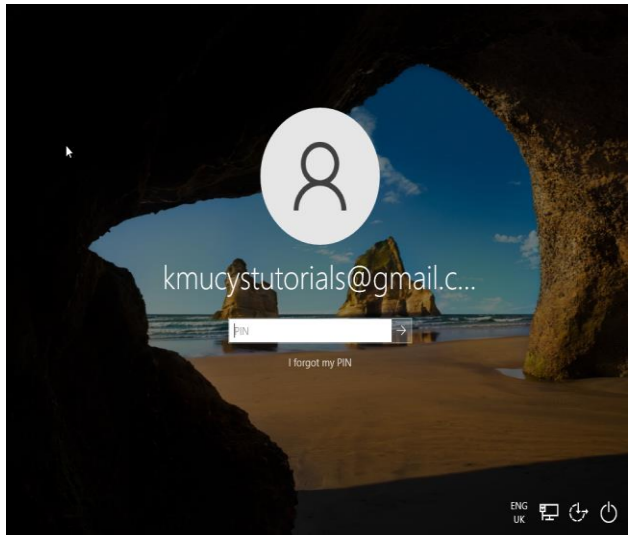

- Locate **cmd** and **Rename** it to **Utilman** and **Refresh** the screen.

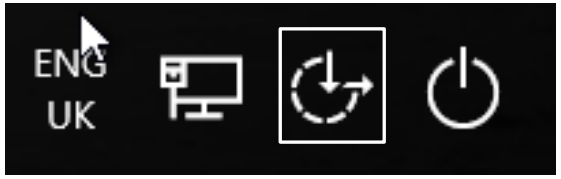

Accessibility

- Close all the windows or tabs then click on **Continue**, wait for your Computer to restart and click on the Magic Icon (**Accessibility**) which is next to the Internet Icon.

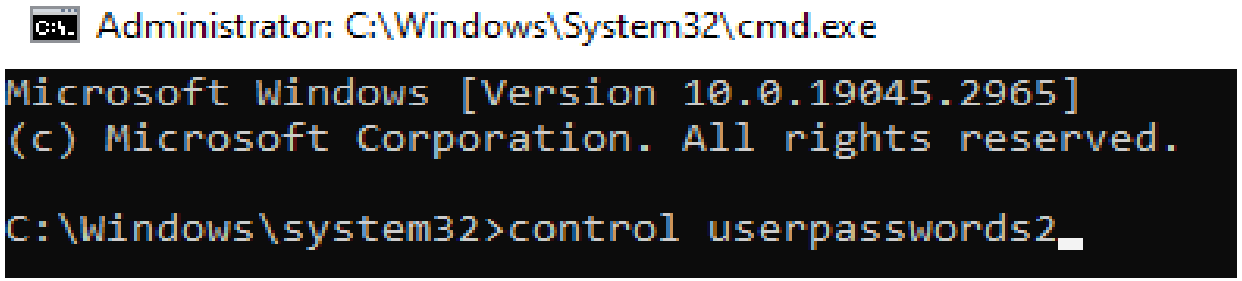

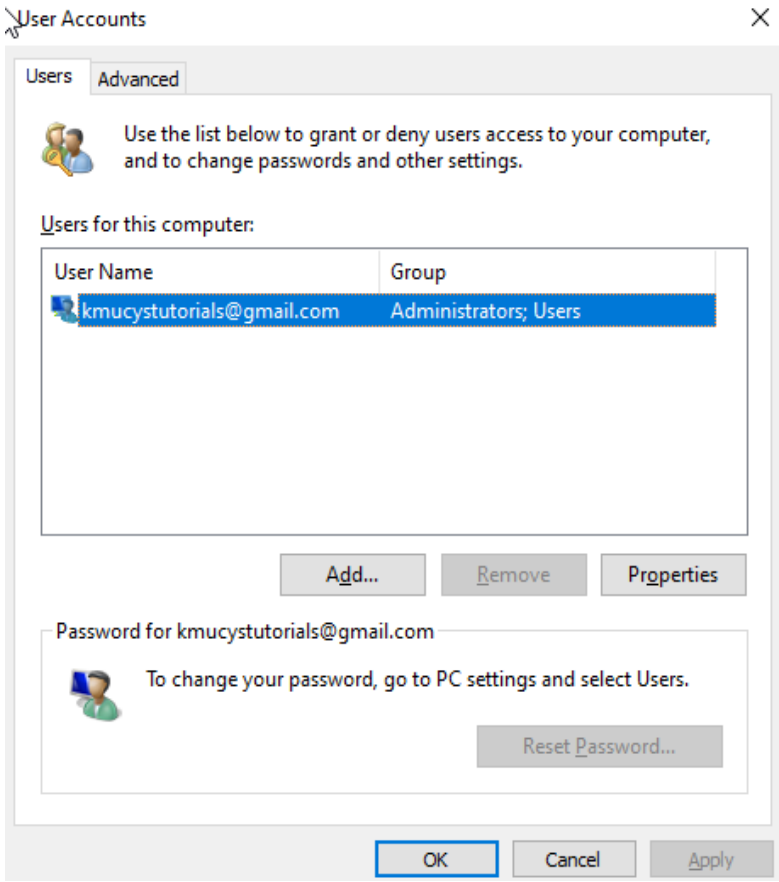

User Accounts

- **Command Prompt** will appear, type in the command;
- **control userpasswords2**

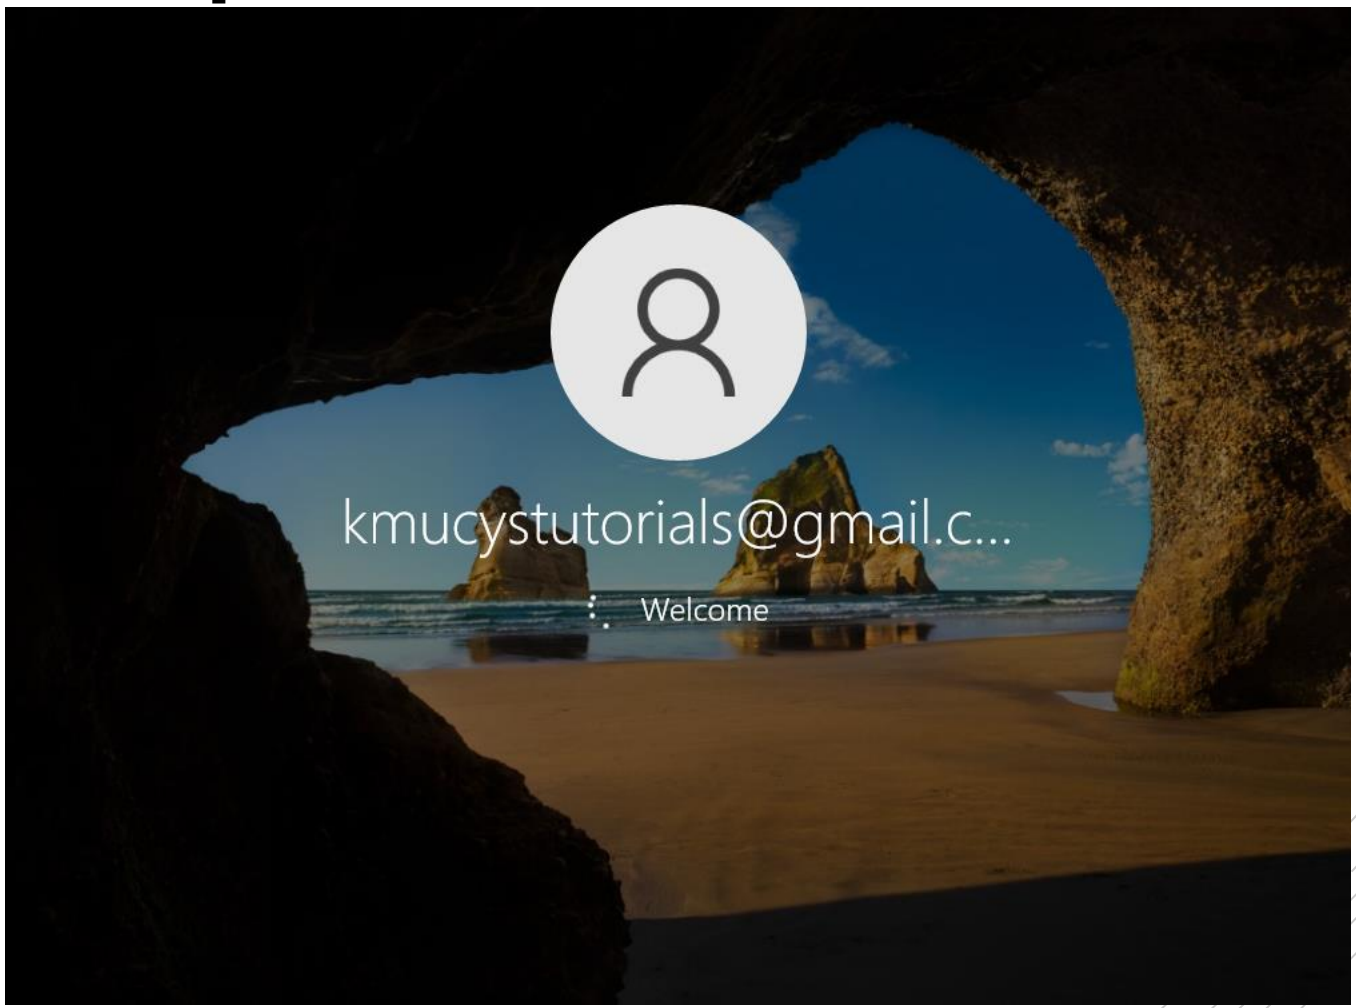

User Accounts (Continues…)

- Then under **User Accounts**, click **Reset Password…**
- Enter New Password or leave it blank and click on **OK**

Login Page

- Close the **Command Prompt** then **Sign In** with or without a password

Forgotten Your Password?

Bypassing Forgotten Password Using Hirens BootCD PE

Creating a Bootable Device

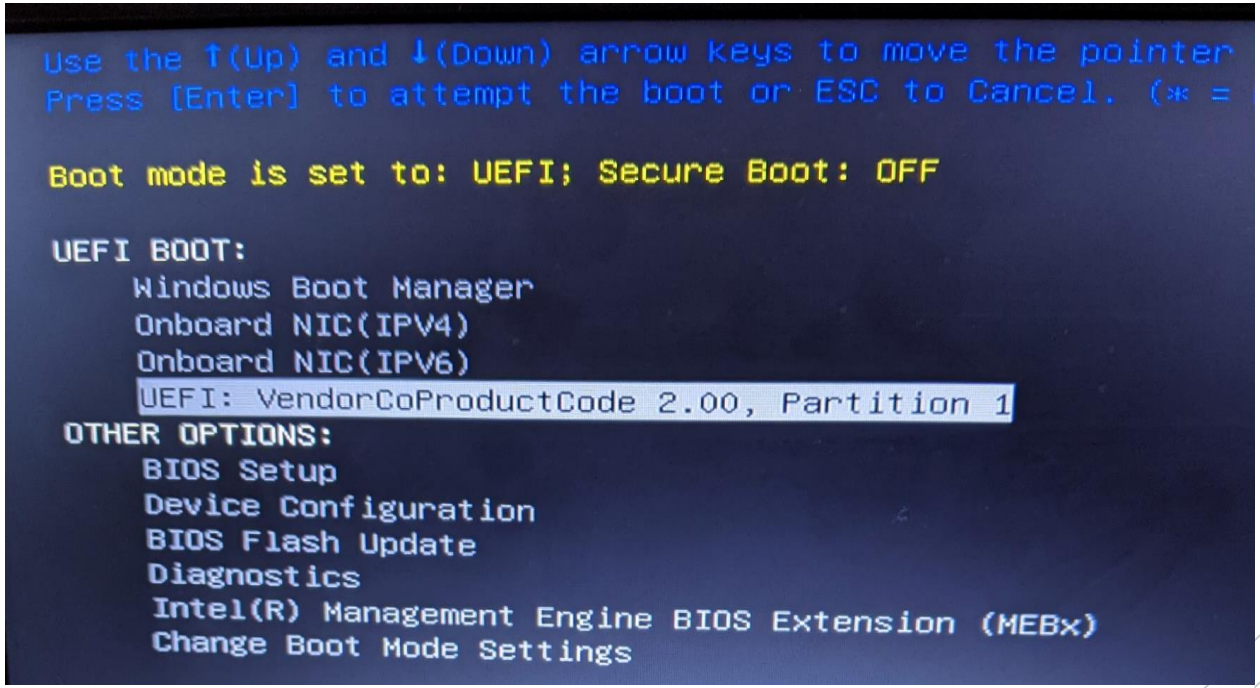

- If you've downloaded **Hiren's BootCD PE** from the actual web, the file will be written as .iso
- Use a booting tool such as **Rufus** or **PowerISO** to make the .iso file bootable into your USB drive.

OR

- If you have the Hiren's BootCD PE as a folder, copy the files into an USB drive and you are ready to go.

Boot Menu

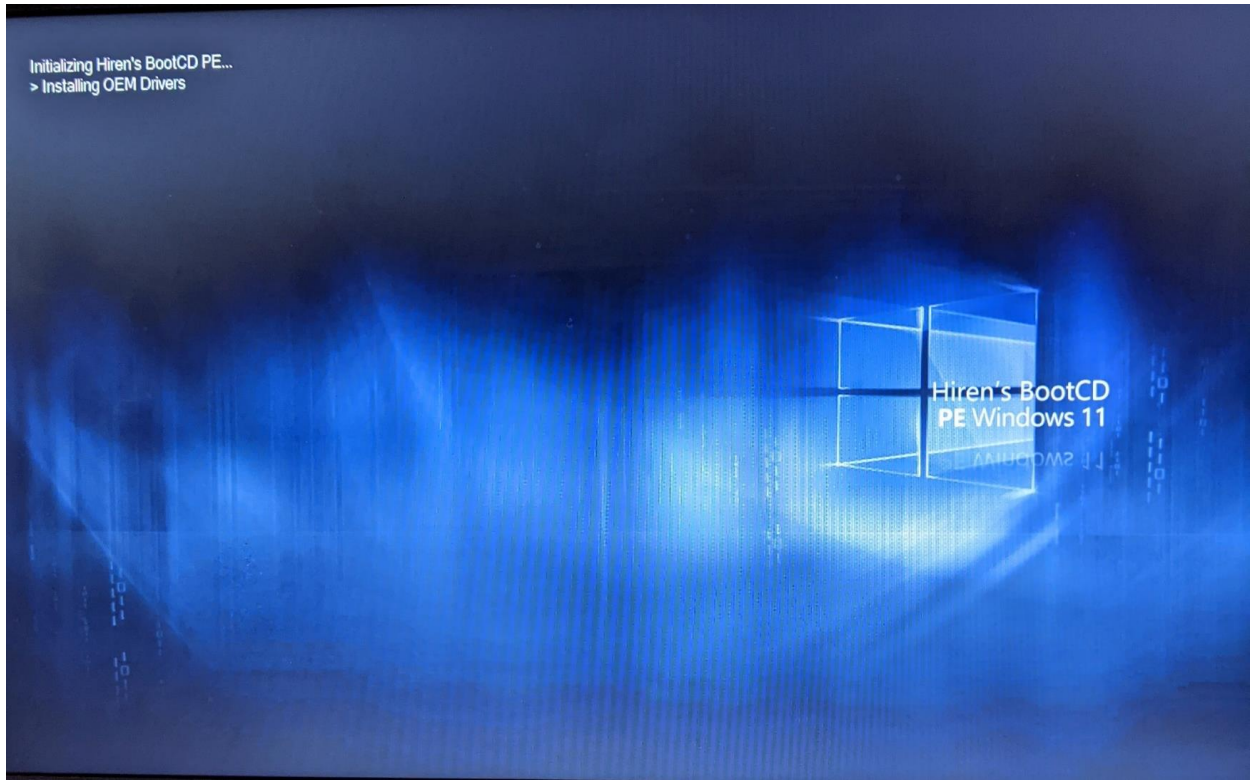

- **Shutdown** and **restart** your PC into the **Boot menu** by pressing **F12** repeatedly depending on your manufacturer.
- Select the bootable USB drive e.g., UEFI: **VendorCoProductCode 2.00, Partition 1**

Hiren's BootCD PE

- Wait for Hiren's BootCD PE to initialize and load up.

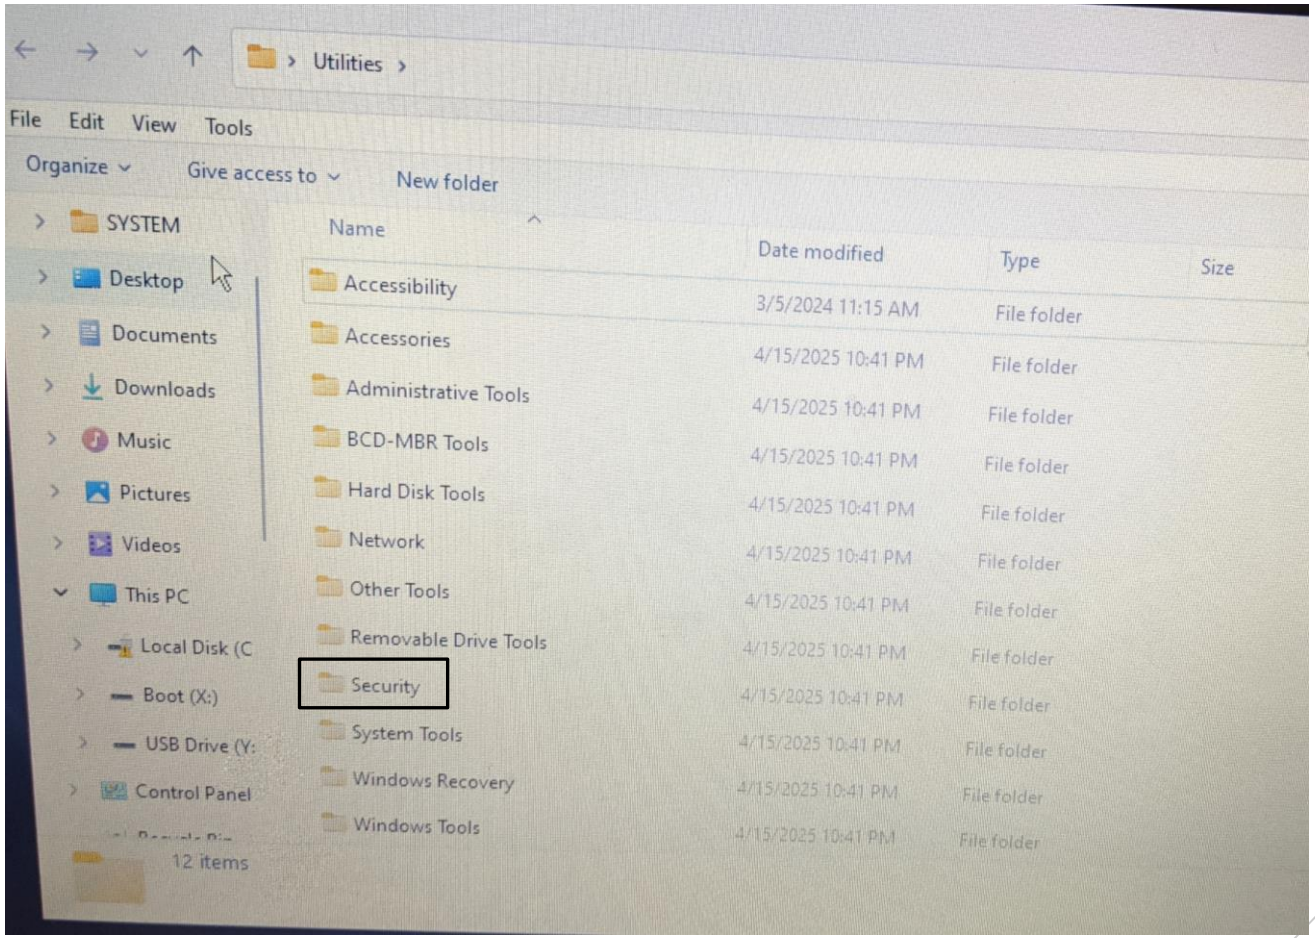

Utilities

- Navigate to the folder called **Utilities** (Located on the Desktop)

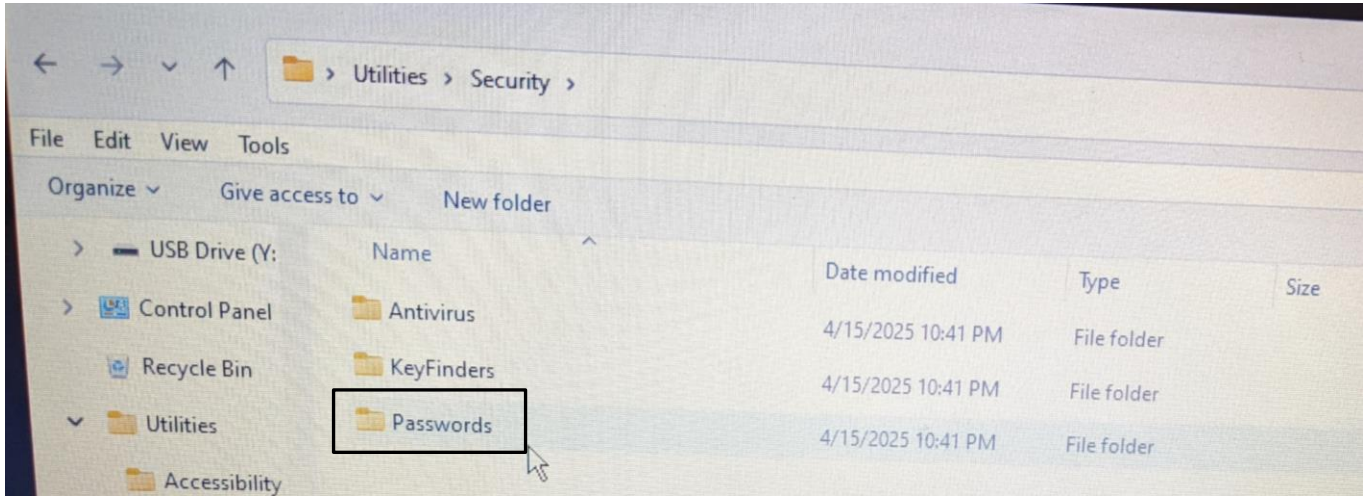

Security

- Navigate to the folder called **Security**

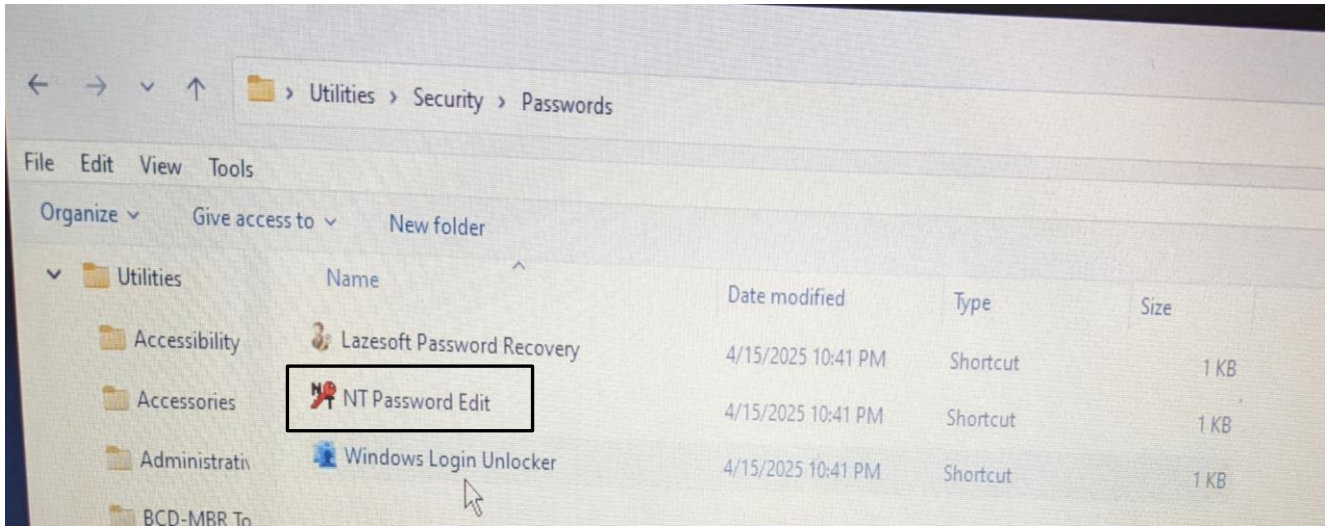

Passwords

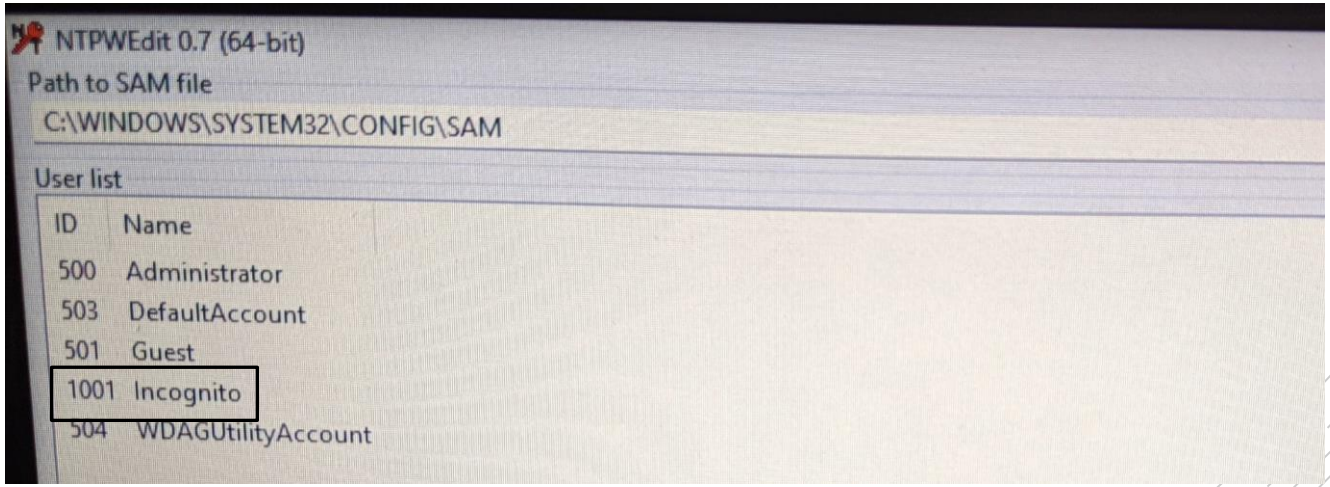

- Navigate to the folder called **Passwords**

NT Password Edit

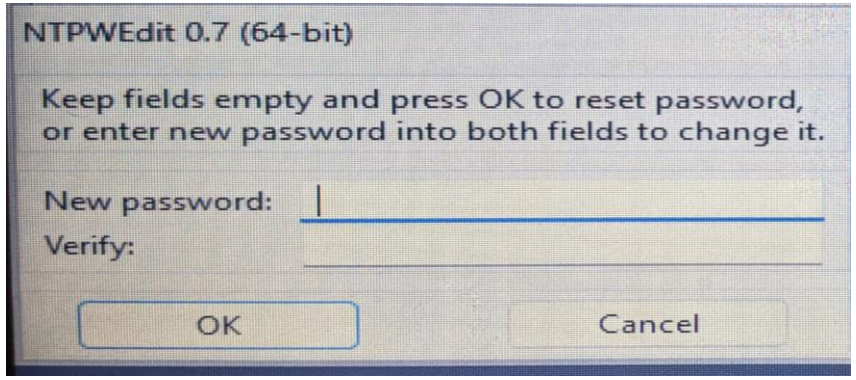

- Tools → **NT Password Edit**

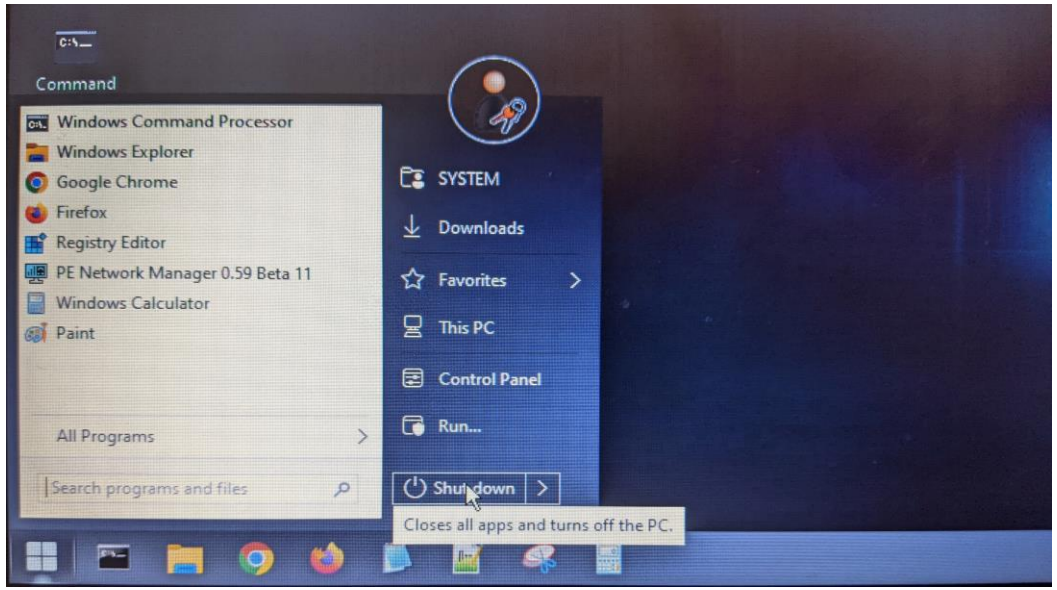

Changing The User Password

- **Change the password** for the user and **shutdown** Hiren's BootCD PE.
