KAPASA MAKASA UNIVERSITY

DEPARTMENT OF AGRICULTURE AND AQUATIC SCIENCES

SA 220: Aquaculture – Assignment 1

INSTRUCTIONS

1. Your report should be at least five pages long, including the reference list.
2. Use 1.5 spacing and Times New Roman font.
3. Follow APA formatting
4. Submit a hardcopy
5. **Deadline Monday 18th March, 2024 at 15 Hours**.

QUESTION

Zambia has seen a rise in cage fishing farming, especially in Lake Kariba, helping bridge the gap between fish demand and supply. Consequently, there are suggestions to extend cage fish farming to other water bodies like Lake Bangweulu and Mweru. Despite its significant contribution, concerns exist about the potential environmental impact of cage fish farming. As a recent graduate of Kapasa Makasa University (KMU) working for a leading cage fishing farming company, your task is to prepare a report outlining the following**:**

A) Identifies the potential negative impacts of cage fish farming.

B) Proposes measures to prevent the negative impacts mentioned in (A) from occurring.

……BEST WISHES……..
